

INTERNATIONALLY ACCREDITED INSTITUTE

CAD For Jewellery Designers

CAD has dramatically transformed the process of design. It enables students / professionals to showcase their work in different perspectives and provides a 360-degree view of a design. Today designers have realized that going digital have considerably reduced their effort and the time they have to put into the mechanics of designs

Designs come to life in 2D and 3D, using the power of technology to transform ideas into expressions. CAD has revolutionised jewellery design, making it possible to create designs with precision in shape, size and colour. The course imparts comprehensive knowledge about CAD commands: both at the intermediate and advanced level to use this knowledge to create your own unique designs, either traditional or contemporary.

I CAD specialized course offers an easy to understand design package that makes jewellery design creation fast and simple, offering various ready to use libraries including rings, cufflinks, bracelets, pendants & more. OR - draw your own creations & add stones for full rendering effects, or leave the mounting open for production. Make creative jewellery to show your clients with full rendering colors of gold, silver, platinum and stone colors - isn't this is must every jewellery designers.
